

## Online Application

1. Submit the Application by email to [solar@edistoelectric.com](mailto:solar@edistoelectric.com).

\*\*\*Commercial Applications or systems above 20kW may have a longer study period or more steps involved before approval and installation.

Mail-in application fees:

USPS Mail  
Edisto Electric Cooperative  
P.O. Box 547  
Bamberg, South Carolina 29003  
ATTN: Solar Interconnection

FedEx or UPS  
Edisto Electric Cooperative  
896 Calhoun Street  
Bamberg, South Carolina 29003  
ATTN: Solar Interconnection

## What documentation needs to be provided with the Interconnection Application?

1. Drawings showing the single-line diagram, location of the solar system on the property with north bearing referenced, location of equipment with respect to the utility meter.
2. Data sheets or specifications for the solar panels, inverters, batteries, etc. being installed.
3. A copy of the HOI showing sufficient liability coverage
4. Edisto Electric Cooperative (Edisto) will review the application. If the system is over-sized, our representatives will contact both the member and the solar company to discuss.
5. Edisto's solar rate will be reviewed with the member, and our representatives will offer suggestions and insights, should we observe any concerns related to issues of shading and/or the physical location of the system.
6. Edisto and the member will both sign the Contingent Approval. This gives assurance that if the proposed system is built, then Edisto will interconnect with it.
7. After the system has been built, the county will inspect it. Edisto will wait to obtain an approved inspection or release from the county before proceeding.

8. Edisto will inspect the system and check for back-feed.
9. Edisto will then sign the Interconnection Agreement. After the Interconnection Agreement has been signed, Edisto will send the executed copy to both the member and the solar company, place the member on Edisto's solar rate, and give permission to operate.
